Skills

Languages: JavaScript, TypeScript, Python, Java, SQL

Frameworks & Libraries: Node.js, Express.js, React, Next.js, Cube.js, LangGraph, dbt MetricFlow

Cloud & Infrastructure: AWS (Redshift, ECS, Lambda, SQS, S3), MongoDB, Redis, BullMQ, Docker, Terraform

Experience

Software Engineer II Oct 2025 - Present

Software Engineer I June 2024 – Oct 2025

PMG Advertising Agency Dallas, TX

- Architected a cross-warehouse API (Node.js, Cube.js) enabling business logic queries across Redshift, BigQuery, and Snowflake; scaled to 10K+ daily requests and reduced time-to-insight by 95% for 60+ enterprise clients
- Engineered a LangGraph natural-language-to-SQL agent, injecting cached unique dimension values from MongoDB to improve query generation accuracy from 57% to 86% across 20K+ monthly queries
- Integrated the dbt MetricFlow engine into the cross-warehouse API, exposing customizable semantic layers across 8+ internal applications and abstracting complex SQL joins
- Designed a two-tier TTL Redis cache for cross-warehouse query results with schema-aware invalidation, reducing p95 job duration by ~80% (164s → 28s)
- Scaled a high-throughput CSV export pipeline (BullMQ, Redis, MongoDB, S3) to process 200GB+ of campaign data daily at 99.8% uptime
- Refactored legacy database publishing onto an event-driven SQS and ECS Fargate pipeline, eliminating 2K+ daily errors through automatic retries and dead-letter queue recovery

Software Engineer Intern June 2023 – Aug 2023

Chera Health Remote, US

- Engineered end-to-end meal plan assignment system using Python, Flask, React, TypeScript, and PostgreSQL, automating dietician workflows and cutting manual setup time from 2+ hours to 15 minutes
- Developed automated testing framework utilizing Selenium WebDriver with ChromeDriver integration, implementing structured logging that reduced manual QA effort by 80% and caught 5+ critical production issues pre-launch

Software Engineer Intern May 2022 – Aug 2022

Prudential Financial Newark, NJ

- Implemented ECS container monitoring service (Python, Boto3) streaming real-time metrics to Splunk dashboards, reducing incident diagnosis time by 67% for 20+ production services
- Built a centralized onboarding portal (Node.js, React, AWS Lambda) consolidating setup guides and technical docs for new engineers, ramping up developer onboarding by 45%

Projects

PMG Data Foundation (Hackathon Winner) | TypeScript, Node.js, dbt MetricFlow Dec 2025

- Led an 8-person team to build a graph-based semantic layer UI (TypeScript, ReactFlow) for customizing a client's data lineage without manual SQL overhead
- Designed the Express API routes for the self-hosted dbt MetricFlow contract alongside backend engineers, gathering requirements from analysts and media teams to map user flows

Multilingual Visual Question Answering | PyTorch, Hugging Face, LLMs Oct 2025 - Nov 2025

- Engineered cross-lingual VQA system integrating LLaVA-1.6 model with custom PyTorch inference pipeline; achieved 85% answer quality improvement across low-resource languages (Uyghur, Kurdish)

Education

Rice University May 2024

BS in Computer Science GPA: 3.7/4.0
